NEWS NEWS NEWS

Teaching Careers students, pictured with their medals, won at the Educators Rising State Conference, 6 will compete at the National Conference in Washington D.C.

Students from Building Trades I, took first and second place in the Competition in a Box contest held at the Carpenter's Training facility, sponsored by the Home Builders association

Program Spotlight

The Welding Technology program is a two-year program taught by Dan Kemper & Tim Bruckerhoff. Within this program students are trained in various types of welds, including plate and pipe.

Blueprint reading, layout and fit-up are integral parts of the curriculum. The program provides a mix of classroom instruction and hands-on lab work.

Students completing the two-year program will earn advanced standing from East Central College.

Students will learn personal development, work attitude and leadership skills as a part of the program and their membership in SkillsUSA, the national career and technical student organization.

Areas of Training

- OXY Fuel Cutting
- SMAW - Stick All Position Welding
- GMAW - Mig All Position Welding
- FCAW - Flux Cored Arc Welding
- GTAW - Tig All Position Welding
- PAC - Plasma Arc Cutting
- SAW - Submerged Arc Welding
- Metal Art Work

Teacher Feature

Stephanie Juengling is the career services coordinator and embedded English teacher at FRCC. She started her teaching journey in special education at Webster Groves High School, when part time English opened at WHS she applied and got the job. Mrs. Juengling wants all her students to reach their highest potential and be as professional as possible in their chosen career. She is impressed with FRCC's selection in teachers "Four Rivers has the best teachers I have ever worked with. I am constantly impressed with what they help students learn/achieve over their time here." One fun fact about Mrs. Juengling: she grows about 1/2 the food she eats.
